Vivek Thakur

Full Stack Developer — React.js & Next.js

Noida, India | +91 7042828354 | vivekthakur7042@gmail.com
GitHub | LinkedIn | Portfolio

Professional Summary

Full Stack Developer with 2.5+ years of experience building enterprise web applications, healthcare ERP/HMIS modules, business websites, and content-management platforms. Strong hands-on experience with React.js, Next.js, JavaScript, Redux Toolkit, REST API integration, reusable UI architecture, and frontend performance optimization. Experienced in technical SEO practices, responsive web development, and production deployment, including a centralized multi-website Blog CMS deployed on AWS EC2 with PM2. Uses AI-assisted development tools for prototyping, code exploration, implementation, and debugging while reviewing generated code for correctness and maintainability.

Technical Skills

Frontend: JavaScript (ES6+), TypeScript, React.js, Next.js, Redux Toolkit, RTK Query, HTML5, CSS3, Tailwind CSS, Bootstrap
Backend and APIs: Node.js, Express.js, Next.js API Routes, REST APIs, Prisma ORM
Databases: PostgreSQL, SQLite, MongoDB, MySQL, Firebase Firestore, Redis
Performance and SEO: Lazy Loading, Code Splitting, Reusable Components, React Memoization, API/Data-Handling Optimization, Lighthouse Audits, Core Web Vitals, Technical SEO, Responsive Design
AI-Assisted Development: AI Coding Assistants, UI Prototyping, Code Generation, Debugging, Iterative Development, AI-Assisted Workflow
Tools and Deployment: Git, GitHub, Postman, Docker, AWS EC2, Google Cloud Platform (GCP), PM2, Vercel, Netlify, Hostinger, cPanel

Professional Experience

Full Stack Developer May 2026 – Present
ACG Infotech Ltd.

- Develop and enhance healthcare ERP/HMIS workflows across Purchase Management, Patient Registration, Pharmacy, Inventory, Dietary Management, Ambulance Management, and MIS Reporting using React.js, Redux Toolkit, and REST API integrations.
- Implement purchase-management screens and workflows for Purchase Requisitions, Requests for Quotation (RFQs), and multi-vendor quotations, integrating frontend functionality with Laravel APIs and PostgreSQL-backed processes.
- Improve application usability and maintainability through reusable components, consistent UI patterns, state-management improvements, and targeted frontend optimizations.
- Rebuilt the company website with Next.js, focusing on responsive layouts, reusable components, technical SEO, and performance-conscious implementation. Used Lighthouse audits to evaluate page quality and identify opportunities for performance, accessibility, best-practice, and SEO improvements.
- Use AI-assisted coding tools to support UI prototyping, code exploration, implementation, and debugging, while reviewing and refining generated code to meet project requirements.

Full Stack Developer May 2024 – April 2026
Digital Rubix – Performance Driven Digital Marketing Company

- Developed and maintained reusable React interfaces and responsive web experiences for client campaigns, emphasizing consistent UI, component reuse, and maintainable frontend code.
- Integrated Salesforce and HubSpot with web forms through REST APIs to support lead capture and transfer submitted information into CRM workflows.
- Applied frontend performance practices including lazy loading, code splitting, and Redux Toolkit-based state management where appropriate.
- Collaborated with designers and campaign stakeholders to translate requirements into responsive interfaces and iterative UI improvements.

Selected Projects

Hospital Information System (HIS/HMIS) | *React.js, Redux Toolkit, Laravel, PostgreSQL, REST APIs*

- Developed and enhanced hospital ERP interfaces and workflows across Purchase Management, Patient Registration, Pharmacy, Inventory, Dietary Management, Ambulance Management, and MIS Reporting.
- Implemented purchase workflow screens supporting Purchase Requisitions, RFQs, and multi-vendor quotations, integrating React interfaces with Laravel APIs and PostgreSQL-backed business processes.
- Improved frontend maintainability and rendering behavior using lazy loading, code splitting, reusable components, Redux Toolkit state management, and targeted React memoization with `React.memo`, `useMemo`, and `useCallback`.
- Worked on API request and data-handling optimizations to support responsive module interfaces and efficient application workflows.

Centralized Blog CMS – Multi-Website Content Management | *Next.js, React, Prisma, SQLite, Tiptap, AWS EC2, PM2*

- Developed and deployed a centralized multi-website Blog CMS on AWS EC2, using PM2 to manage the Node.js application process in production.
- Built a unified admin dashboard with multi-site content management, site-specific categories and tags, Tiptap rich-text editing, local media storage, and API-based content delivery.
- Integrated Prisma ORM with SQLite and implemented cookie-based admin authentication and publishing workflows.
- Applied reusable components, lazy loading, code splitting, and React memoization where appropriate to support maintainable UI code and rendering efficiency.

SureGo – Ride-Hailing Platform | *React, Node.js, Express, MongoDB, JWT* GitHub

- Developed a ride-hailing application with user, driver, and admin workflows, JWT authentication, role-based authorization, and protected API endpoints.
- Implemented ride lifecycle states, driver onboarding and approval, availability controls, and role-specific dashboards using React, Express, and MongoDB.

Internship

Full Stack Web Development Intern May 2022 – November 2022
Pepcoding Private Limited – Instagram Clone *GitHub*

- Developed a MERN-based social application with JWT authentication, post creation, likes, comments, and follow/unfollow functionality.
- Built REST APIs and responsive React interfaces, and worked with MongoDB CRUD operations, pagination, and Redux Toolkit for state management.

Education

Aryan Institute of Technology, Ghaziabad 2020 – 2023
Bachelor of Technology in Computer Science | CGPA: 7.6/10

Jamia Millia Islamia, New Delhi 2017 – 2020
Diploma in Computer Engineering | CGPA: 8.0/10
